

This position is a Plan Formulator under the Plan Formulation Section of the Plan Formulation Branch in the Planning and Environmental Division. The position can be filled by any of the listed background expertise, shown as various series. The selected candidate will serve as the plan formulator on several multipurpose, comprehensive, and regional/statewide water resource civil works projects. This means they will collect basic data developed internally and from other agencies and analyses that data to determine the extent of the water resource problems and formulate possible alternative plans to be investigated, and lead and work with an interdisciplinary team to make a recommendation on solutions to address those problems. As part of that they will also assist in preparation of reconnaissance and feasibility reports; meet with team members to

and assist in the arrangement of public meetings, workshops, and coordinate meetings to facilitate full participation by other agencies, groups and individuals.

### Permanent Position

Community planning; or related field such as urban affairs, architecture, landscape architecture, engineering, sociology, geography, economics, political science, or public administration that included at least 12 semester hours in the planning process, socioeconomic and physical elements of planning, urban and regional economic analysis, and development finance.

*Note: Applicants with degrees in related fields, such as those listed above, who do not have the 12 semester hours of specified course work must have had a least 1 year of work experience in community planning acquired under the supervision and guidance of a community planner.*

OR

Courses equivalent to a major in one of the above disciplines, or a combination of related courses totaling at least 24 semester hours in any combination of the above disciplines of which at least 12 semester hours were in the planning process, and socioeconomic and physical elements of planning, plus appropriate experience or additional education.

- a. biological sciences, agriculture, natural resource management, chemistry, or related disciplines appropriate to the position.

OR

Courses equivalent to a major, as shown in A above, plus appropriate experience or additional education.

- a. Engineering. To be acceptable, the program must: (1) lead to a bachelor's degree in a school of engineering with at least one program accredited by ABET; or (2) include differential and integral calculus and courses (more advanced than first-year physics and chemistry) in five of

OR

- c. Combination of Education and Experience: College-level education or training that provided knowledge equivalent to that described in A above, plus appropriate technical experience or additional education.

OR

2. supervisory or project coordination assignments involving a staff of professional economists, and requiring the evaluation and interpretation of economic information; or
  3. teaching assignments in a college or university that included both class instruction in economics subjects and one of the following (1) personal research that produced evidence of results, (2) direction of graduate theses in economics, or (3) service as a consultant or advisor on technical economics problems.
- ii. Experience in related fields that did not involve the use and understanding of economic principles and theories may not be used as qualifying experience for these positions.
