

- x 18 years old (84%)
- x No freshman scholarship (72%)
- x White (67%)
- x Female (54%)
- x From Mobile or Baldwin County (51%)
- x Lived off-campus (51%)
- x USA GPA of 2.0 or below (48%)
- x Earned 12.5-18 USA credit hours (33%)
- x High school GPA between 3.01-3.5 (33%)
- x Composite ACT score of 19 or 20 (26%)
- x Attended the fifth freshman new student orientation session (20%)

Where Non-returning Students Transferred

Of the 173 non-returning students who transferred, a large majority transferred to an institution with one or more of three characteristics: 1) the institution was likely public (89%), 2) two year institution (71%), and/or 3) located in Alabama (62%). Mississippi (16%) was also a likely transfer destination (see Table 1: Types of Institutions Where USA Students Transferred and Table 2: Top 5 States Where USA Students Transferred).

Table 1: Types of Institutions Where USA Students Transferred

2 or 4 Year Institution	Count	%	Public or Private Institution
-------------------------	-------	---	-------------------------------

The most common two year institutions of choice were Faulkner State (40), Bishop State (23), and Mississippi Gulf Coast (22). Of the four year universities, Auburn (5) and Alabama (5) were the most common transfer destinations (see Table 3: Top 10 Institutions Where USA Students Transferred tables).

Table 3: Top 10 Institutions Where USA Students Transferred

Rank	College	Count	%
1	FAULKNER STATE COLLEGE	40	23%
2	BISHOP STATE COMMUNITY COLLEGE	23	13%
3	MISSISSIPPI GULF COAST COMMUNITY COLLEGE	22	13%
4	AUBURN UNIVERSITY	5	3%
4	UNIVERSITY OF ALABAMA	5	3%
4	SOUTHERN UNION STATE COMMUNITY COLLEGE	5	3%
7	PENSACOLA JUNIOR COLLEGE	4	2%
7	WALLACE STATE COMMUNITY COLLEGE	4	2%
9	JEFFERSON STATE COMMUNITY COLLEGE	3	2%

- x 74% of the non-returning students who “stopped out” had a USA GPA of 2.0 or below (214) compared to 48% of non-returning students who transferred (79).

were far more likely to “stop out” while students from other regions, particularly the Mississippi service area were more likely to transfer than students from the same region

- x 74% of nonreturning students who “stopped out” came from Mobile or Baldwin County (239) compared to 51% of nonreturning students who transferred (89).
- x 15% of nonreturning students who transferred came from the Mississippi service area (25) compared to 4% of nonreturning students who “stopped out” (14).

Five other comparison groups showed percentage based differentials greater than or equal to 10% between students who “stopped out” and students who transferred. The other five comparison groups were 1) orientation session, 2) housing, 3) gender, 4) high school GPA (included two sub groups), and 5) age

- x 29% of nonreturning students who “stopped out” attended the adult or August new student orientation session (5) compared to 17% of nonreturning students who transferred (2).
- x 62% of nonreturning students who “stopped out” lived off-campus (202) compared to 51% of nonreturning students who transferred (89).
- x 56% of nonreturning students who “stopped out” were male (182) while 46% of nonreturning students who transferred were male (80).
- x 20% of nonreturning students who “stopped out” had a high school GPA of 2.5 or below (51) compared to 10% of nonreturning students who transferred (4). In addition, 28% of nonreturning students who transferred had a high school GPA of 3.51 or higher (41) compared to 6% of nonreturning students who “stopped out” (41).
- x 84% of nonreturning students who transferred were 18 years old (45) compared to 69% of nonreturning students who “stopped out” (222).

### Implications

- x Findings indicated a large percentage based difference between students who “stopped out” with less than six USA earned hours (29%) or students with a USA GPA of 2.0 or below (26%) compared to

persistence at USAr to prepare them to transfer elsewhere. While the preference is to encourage USA freshmen students to continue and persist at USA, a student who successfully transfers to another institution could also be considered a secondary measure of success compared to a complete "stop out" from higher education.

- x Early alert signals for students at greater risk to "stop out" altogether instead of transferring elsewhere include local students (23%), attendance at the adult or August orientation session (12%), students living off campus (11%), high school GPA of 2.5 or below (10%), and male students (10%). Students with those characteristics are unlikely to transfer to another institution.
- x 58% of nonreturning students who "stopped out" attended the adult, August, or fifth freshman new student orientation session. Students attending one of these orientation sessions should be targeted with interventions to help them persist and return.

## APPENDIX

## Crosstabs of Fall 2008 Freshman Cohort Non-returning Students
